

RUDRA PRATAP SINGH

FULL STACK WEB DEVELOPER | SOFTWARE ENGINEER

+91 8544692914 / rudrasingh0094@gmail.com / github.com/Rudra-Singh18 / linkedin.com/in/rudra-singh-708872364 / [Portfolio RudraPratapSingh](#)

SUMMARY

Computer Science Engineering student specializing in Full Stack and Backend Development with hands-on experience in REST APIs, scalable web applications and AI-powered solutions. Skilled in Python, JavaScript, React.js, Node.js, and SAP ABAP with strong problem-solving and software development fundamentals.

WORK EXPERIENCE

Backend Developer Intern | SPRINGER CAPITAL, Oct 2025 - Jan 2026

[GitHub](#)

- Developed an Employee Management System using Python and JavaScript, improving attendance and data management efficiency by 30%.
- Developed RESTful APIs using Node.js and Express with CRUD operations, JWT authentication, filtering, and secure data handling.
- Created interactive dashboards using Chart.js and documented APIs with OpenAPI.
- Managed version control and collaboration using Git and GitHub.

PROJECTS

BHAVNA – Behavioral Human Analysis for Virtual Networking Assessment

[WebSite](#) / [GitHub](#)

Tech Stack: React.js, Vite, Tailwind CSS, JavaScript, Face-API.js, Web Speech API, Google Gemini 2.5 Flash, HTML, CSS

- Developed and deployed an edge-optimized AI-powered mock interview platform that performs real-time behavioral and communication analysis directly in the browser.
- Implemented facial expression and eye contact tracking using Face-API.js, along with speech pace and pause analysis through the Web Speech API to capture live interview metrics.
- Integrated Google Gemini 2.5 Flash to process behavioral telemetry and generate comprehensive, presentation-ready interview performance reports with personalized feedback.
- Designed a responsive React-based user interface with real-time analytics, interactive dashboards, and serverless architecture for fast, secure, and cost-effective interview assessment.

DHRISTI, AI Powered Sign Language Translator

[GitHub](#)

Tech Stack: Python, OpenCV, MediaPipe, TensorFlow

- Developed an AI-powered Sign Language Translator using Python, OpenCV, MediaPipe, and TensorFlow to convert hand gestures into real-time text output.
- Implemented Computer Vision and ML techniques for hand tracking and gesture recognition.
- Utilized MediaPipe for real-time hand landmark detection, improving gesture recognition accuracy and processing speed.
- Designed an interactive and user-friendly interface to enhance communication accessibility for speech and hearing-impaired users.

EDUCATION

Parul University — B. Tech CSE (SAP) | 2023–2027

Modern Academy — CBSE XII (70%) | 2023

DAV Public School — CBSE X (86%) | 2021

SKILLS

Languages: Python, JavaScript, SAP ABAP

Frontend: HTML, CSS, React.js

Backend: Node.js, Express.js, REST APIs

Database: MySQL, MongoDB

Other: DSA, Operating Systems, Git/GitHub, OOPs,

CERTIFICATES

SAP Certified ABAP Backend Developer- ABAP Cloud | 2025

JP Morgan Software Engineering Job Simulation- Forage | 2026

Advanced Prompt Engineering with ChatGPT- UpGrad | 2026

TATA – GenAI Powered Data Analytics Job Simulation- Forage | 2026

Skyscanner - Front-End Software Engineering- Forage | 2026

Hewlett Packard Enterprise - Software Engineering Job Simulation- Forage | 2026
